

OWNER EXPERIENCE

The yacht, the destination and the day - in one private view.

SIGVORA gives the Owner a clear, personal view of the enjoyable side of life on board and ashore. It brings recommendations, menus, services, entertainment and personal requests together without turning the Owner view into a technical vessel dashboard.

THE EXPERIENCE PRINCIPLE

Enjoy more. Search less. Ask once.

What the Owner can see

DESTINATION & SHORE	Nearby excursion ideas, restaurants, beach clubs, beautiful beaches, places worth seeing and selected local recommendations.
TODAY ON BOARD	The Head Chef's breakfast recommendation, lunch and dinner menus, spa offers, the onboard wine selection and the entertainment programme.
PERSONAL REQUESTS	A simple route to send a wish, preference or request to the Captain, Purser or Chief Stew - and to share meal preferences with the service team.

A daily experience snapshot

Breakfast Today's recommendation and preferred service time.	Lunch Menu, setting and any personal wishes.	Dinner Menu, wine pairing and evening plan.
Wellbeing Spa and relaxation options available today.	Discover Destinations, restaurants and beaches nearby.	Entertainment The onboard and shore-side programme.

CLEAR RESPONSIBILITY

A private service layer - not an operating channel.

The Owner experience is intentionally different from the Captain, Purser, Chief Stew and Management views. It presents the information that improves the Owner's day while keeping professional responsibility with the people who run the yacht.

THE CAPTAIN REMAINS RESPONSIBLE

Vessel details, technical matters, operations, budgets, costs and the formal communication around them remain with the Captain and the responsible crew or management. SIGVORA does not replace that chain of command.

Requests reach the right person

Captain A personal message or request requiring the Captain's attention.	Purser Guest arrangements, reservations, travel or service coordination.	Chief Stew Interior service, spa, table setting, events and personal preferences.
Head Chef Meal wishes, dietary preferences and menu feedback through the service flow.	One clear request The Owner does not need to repeat the same wish to several people.	Visible follow-up The responsible person can acknowledge and coordinate the request.

Why this strengthens the yacht experience

More personal Preferences and daily choices create a service experience that feels considered rather than generic.	More connected The Owner sees what is relevant while the crew keeps responsibility for delivery and operations.	More enjoyable Less searching and fewer repeated questions leave more time to enjoy the yacht and destination.
